Projects

Meal-Tab
A web based application targeted to making life easier for the patronizers of a brand, the brand in question, sells and deliver meals to their clients. The brand owns a restaurant where their patronizers can visit to chill and have meals, they also have some reserved chefs that work at events, their job is to prepare the catering services that may be needed in any event. The Meal-tab application, enables the users to order their favourite meals online, pay for the meals online and get them delivered to their preferred destination, the application

also has a feature that enable users to book a table at Meal-tab restaurants, the application also enables users to book Meal-tab chefs for an event they might be looking forward to host.

Technogies Used

• Html5, Javascript, Bootstrap, Django, CSS3, Jquery, PostreSQL
